EZdvr Hard Drive Replacement

1. Swap out the hard drives in the DVR.
2. Installer needs to login as installer (if the installer needs password, the Installer needs to email above prior to install).
3. Right click with mouse and select Setup.
4. Select Storage.
5. If the new Hard Drive shows up under Recording as Active/Healthy you are done. If not continue.
6. Select New
7. Left mouse click new drive & select Recording format.
8. Choose yes.
9. Wait until done and select save.
The new Hard drive is active!
